

PREMIER®

66 Blocks

PREMIER offers three popular varieties of 66 blocks for standard network terminations as well as the accessories needed to mount and connect them. The blocks are made with high impact, flame retardant material, making them very durable and safe. The blocks can terminate 18 to 26 gauge conductors.

66M1-50R block

The 66M1-50R block is best suited as the interface between the Service Provider and the customer premises. This block has a female 25 pair RJ21X interface on one side that is prewired to row D of the block. Fanning strips with notches every ten rows are used to route and organize 25 pair cables. It also includes an 89D bracket that allows for easier mounting and spacing. A hinged orange cover helps protect the connections and designate the block as the demarcation point.

- » Item Number: **0000211132**
- » Vendor Part Number: 66M1-50R
- » Made in the USA.

66M1-50 block

The 66M1-50 block is a Category 5e rated block used for terminating high speed applications such as Voice over IP (VoIP) and Gigabit Ethernet. The block has a 50 row capacity with four pins across. Fanning strips with notches every ten rows are used to route and organize 25 pair cables.
