The PREMIER 7010 is a basic, single-line phone with all the functions of a real workhorse embodied in a sleek style that is great for business or hospitality applications. Best of all, this phone is competitively priced, making it a great value.

Time-tested features include a convenient Data Port, an amber neon 90-volt message waiting light to ensure messages are instantly noticed, and ample space is provided for a customized facemat. Handset volume is easily amplified at the press of a button located on the front of the phone and returns to normal after each call. The ringer volume is easy to adjust by switching between the low, medium and high settings.

The PREMIER 7010 is line powered to eliminate the need for batteries or AC adapters. A modular data port runs parallel with the telephone line for connecting modems, laptops, and fax or answering machines. Other features include an oversized dial pad and an A-Lead control option that's selectable to provide extension-in-use indication on a host console.

Every PREMIER Series 7000 telephone is quality-assured— backed by a two-year limited warranty. PREMIER 7010 telephones undergo rigorous lab testing before earning the PREMIER brand. They are also FCC registered, Industry Canada certified and UL listed. This telephone meets ADA receiver volume control requirements.

The PREMIER Series 7000 family of telephones ranges from basic single-line to two-line speaker telephones with memory. If you're looking for a telephone that is loaded with user-friendly features, look to PREMIER Series 7000.
