

CyberPower®

CyberShield® FTTx DC Battery Backup System for ONT / NIDs

CyberPower Systems from Premier, a proven leader in providing power protection solutions, introduces a new line of Desktop Power Supply and Battery Backup Units. These units are designed to support new indoor Desktop Optical Network Terminals recently introduced by vendors like ADTRAN and Calix. Models DT30U12V-NA3 and DT30UU12V-NA3-G have been designed for inside the home on the desktop with the ONT and are wall mountable. The flexibility offered by these units allow for faster installation as well as the mobility to be located with other utility devices such as phones, cable boxes and home electronics. Wiring is faster, typically resulting in lower installation costs.

These units provide power during normal conditions and battery power in the event of a power outage. We've got you covered.

Features & Benefits

- » FTTx Power Supply and Battery Backup Unit for desktop use
- » Compact design saves installation space
- » Visual indicators and audible alarm provide the unit status
- » Emergency cold start function allows for "last gasp" 911 availability
- » Easy user-replaceable batteries
- » Safe shutdown prior to any thermal damage
