*PT-267A-4 Modular T-Adapte (with Tail)*

## PREMIER PT-267A-4 Modular T-Adapter (with Tail)

The PT-267A-4 Modular T-Adapter (with Tail) connects two telephone or ancillary devices to one outside line using an existing modular installation. Two 6 position 4 conductor jacks are wired in parallel to one 6 position 4 conductor plug, mounted at the end of a 4-inch line cord tail. The 4-inch line cord tail provides extra flexibility during installations, to avoid blocking adjacent ports on installed CPE or hardware.

PT-1542A Filter

## PREMIER PT-1542A Radio Interference Filter

The PT-1542A jack is non-modular and used to filter AM/FM and CB broadcast interference. This 4 conductor jack can be used in place of a 42A connecting block. The plastic base consists of a toroidal choke coil plus screw terminals and is housed in a plastic cover. Installation consists of connecting the spade leads from a non-modular line cord to the wire leads inside the filter.
